Face sunscreen SPF30

The sun cream face SPF30 ensures a **high natural sun protection**. Its high tolerance mineral screens protect your skin from UVA and UVB rays. Alga-Gorria®, a patented red algae extract with powerful antioxidant action, protects skin cells from the harmful effects of free radicals, including premature aging. The cream's non-greasy formula offers genuine **moisturizing and matifying** properties while providing comfort and softness to the skin.

The SPF30 index is **suitable for light and sun-sensitive skin** (prone to sunburn). Its certified organic formula is composed of ingredients of natural origin. It is perfectly adapted to the practice of sport, even extreme: it is **resistant to water and perspiration**. Thus, the product does not run in the eyes and does not create irritation. It provides effective protection during all outdoor activities.
